ABOUT THE SMSC ORGANICS RECYCLING FACILITY

The SMSC Organics Recycling Facility reflects the Dakota tradition of caring for the earth. We take organic waste—food waste, yard waste—and break it down into something that's good for the earth and your soil. This process has diverted thousands of tons of refuse from local landfills.

Many of our neighbors—including local cities and school districts—sustainably dispose of their waste at our facility. We're open to the public year-round and frequently offer free yard waste drop-off to Scott County residents.

If you have questions, give us a call, visit our website, or stop by our facility!

OUR SERVICES

We **accept**:

Brush/logs/chips/pallets (clean) **Yard waste** *(grass clippings, leaves, mulch, mixed loads with brush, etc.)* **Food waste** **Sod/dirt (must be free of rocks)**	**$15/load**

OUR PRODUCTS

We're all about bringing you high-quality, environmentally friendly products for whatever project you're working on. We produce Dakotah Roots compost, compost blends, mulch, and more to improve soil structure, increase nutrient content, and help ward off plant diseases. Fertile soil retains moisture so you can water less. All of our products are made in a sustainable way from organic matter, so you can feel good knowing you're doing what's best for the earth.

MULCH

Mulch is a layer of material applied to the surface of an area of soil. Among other benefits, mulch conserves moisture, improves the fertility of the soil, reduces weed growth, and enhances the visual appeal of the area.

1. Natural	**$19/CY**
2. Dark Brown	**$32/CY**
3. Gold	**$32/CY**
4. Red	**$32/CY**

DAKOTAH ROOTS PRODUCTS

5. Seven Generations Blend **$21/CY**
(half-inch screened compost)
This rich soil amendment is great for gardens, landscaping, turf establishment, horticulture, and agricultural applications.

6. Half Moon Blend **$26/CY**
(50% topsoil, 50% compost)
This blend forms a nutrient-rich growing mix that will provide superior performance for a wide variety of plants.

7. Harvest Moon Blend (Garden Blend) **$33/CY**
(40% topsoil, 40% compost, 20% peat)
The peat in this blend helps naturally produce lower pH levels that vegetables prefer. The compost acts as a rich soil amendment while the topsoil adds a mineral component that is critical to well-balanced garden soil.

8. Rain Garden Blend **$30/CY**
(sand and compost)
The sand in the Rain Garden Blend allows infiltration of rainwater rather than releasing it over the land. The compost incorporated in the blend aids in plant growth.

9. Topsoil **$28/CY**
(screened black dirt)
Upon availability
Our topsoil is easy to spread and great for gardening and seeding. Adding topsoil allows nutrients and water to flow naturally through the soil, allowing for optimal plant growth.

CY = cubic yards

OTHER PRODUCTS

Bagged Compost & Compost Manure **$5.50/bag**
(half-inch screened)

Delivery available upon request. Please call **952.233.9191** for more details.
